Set statistical parameters -- pop\_statparams()

General statistical parameters

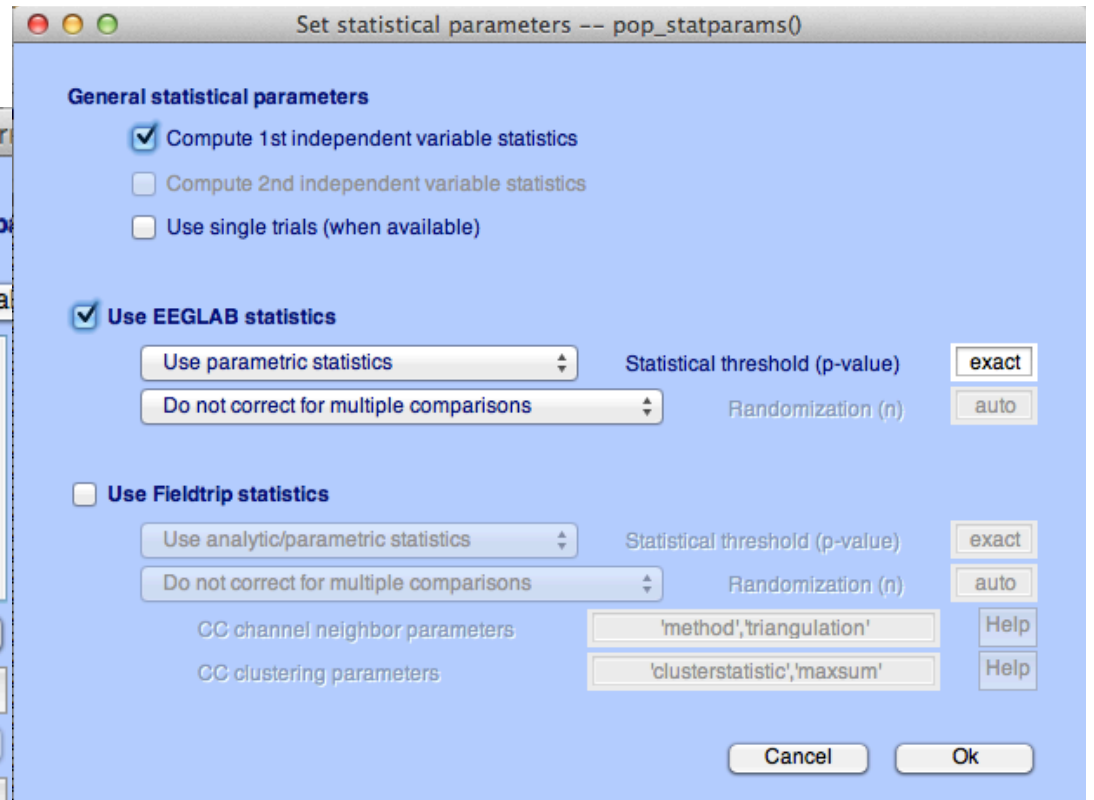

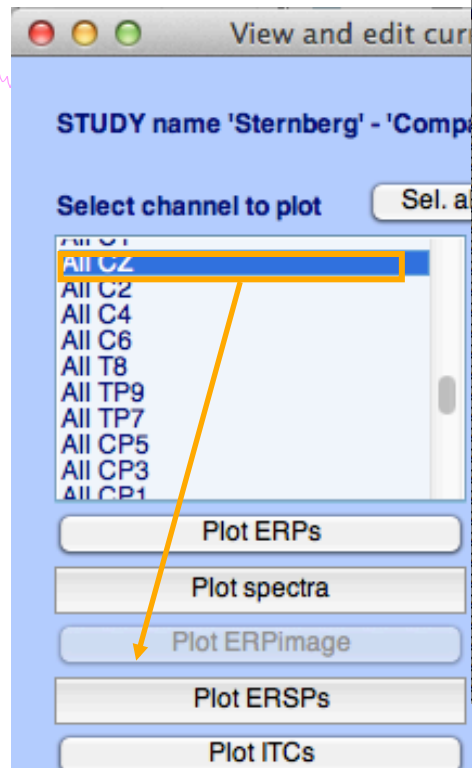

☒ Compute 1st independent variable statistics  
☐ Compute 2nd independent variable statistics  
☐ Use single trials (when available)

☒ Use EEGLAB statistics  
Use parametric statistics  
Use FDR correction  
Statistical threshold (p-value) 0.05  
Randomization (n) auto

☐ Use Fieldtrip statistics  
Use analytic/parametric statistics  
Do not correct for multiple comparisons  
Statistical threshold (p-value) exact  
Randomization (n) auto  
CC channel neighbor parameters 'method','triangulation' Help  
CC clustering parameters 'clusterstatistic','maxsum' Help

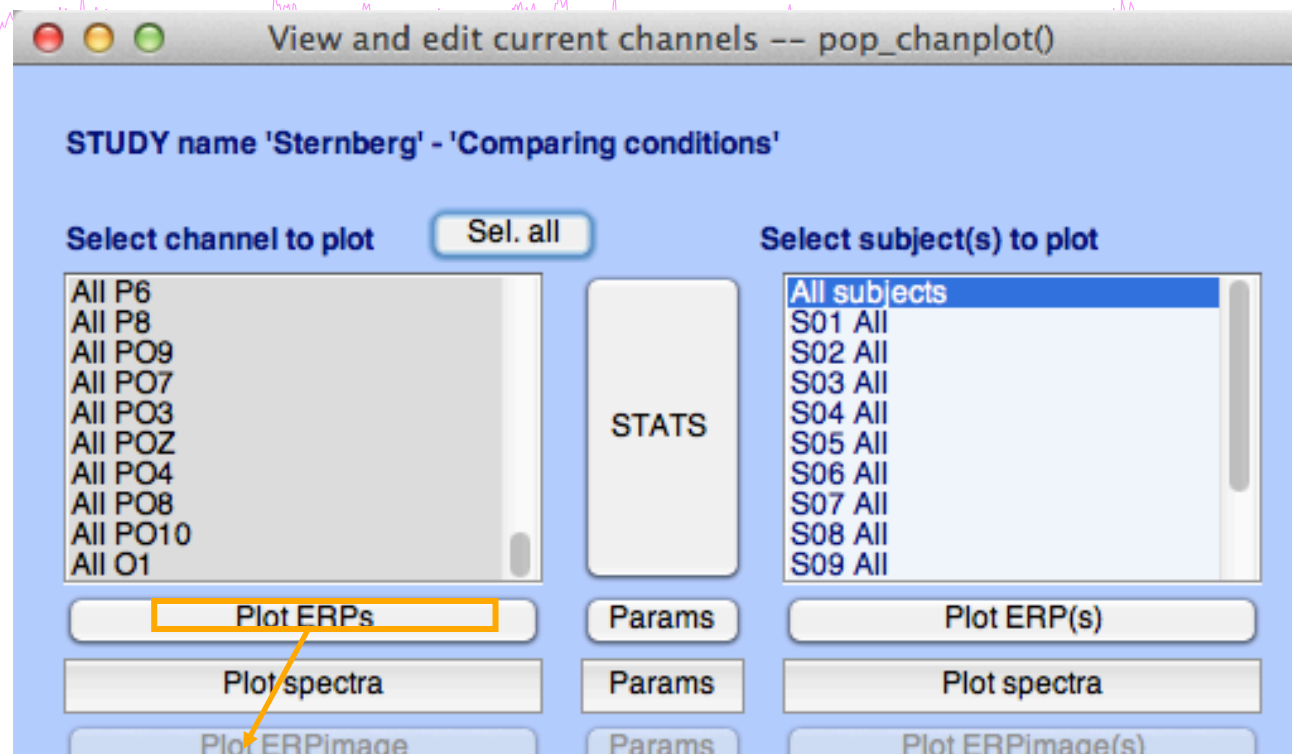

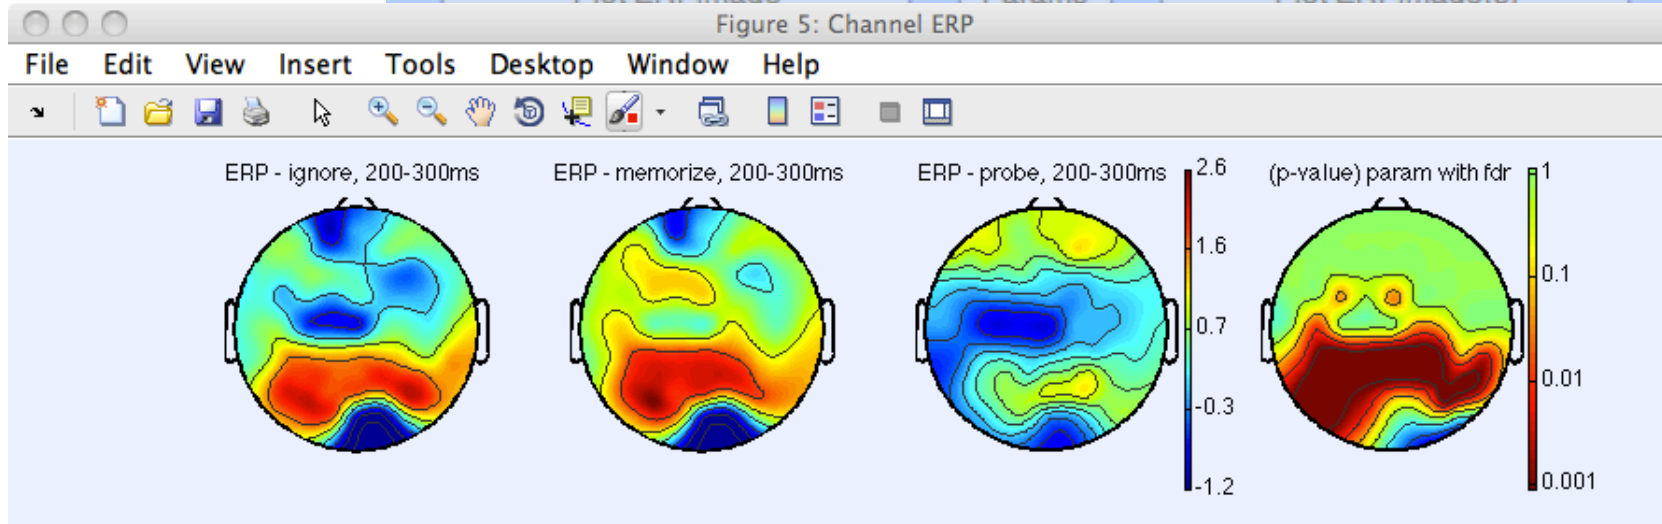

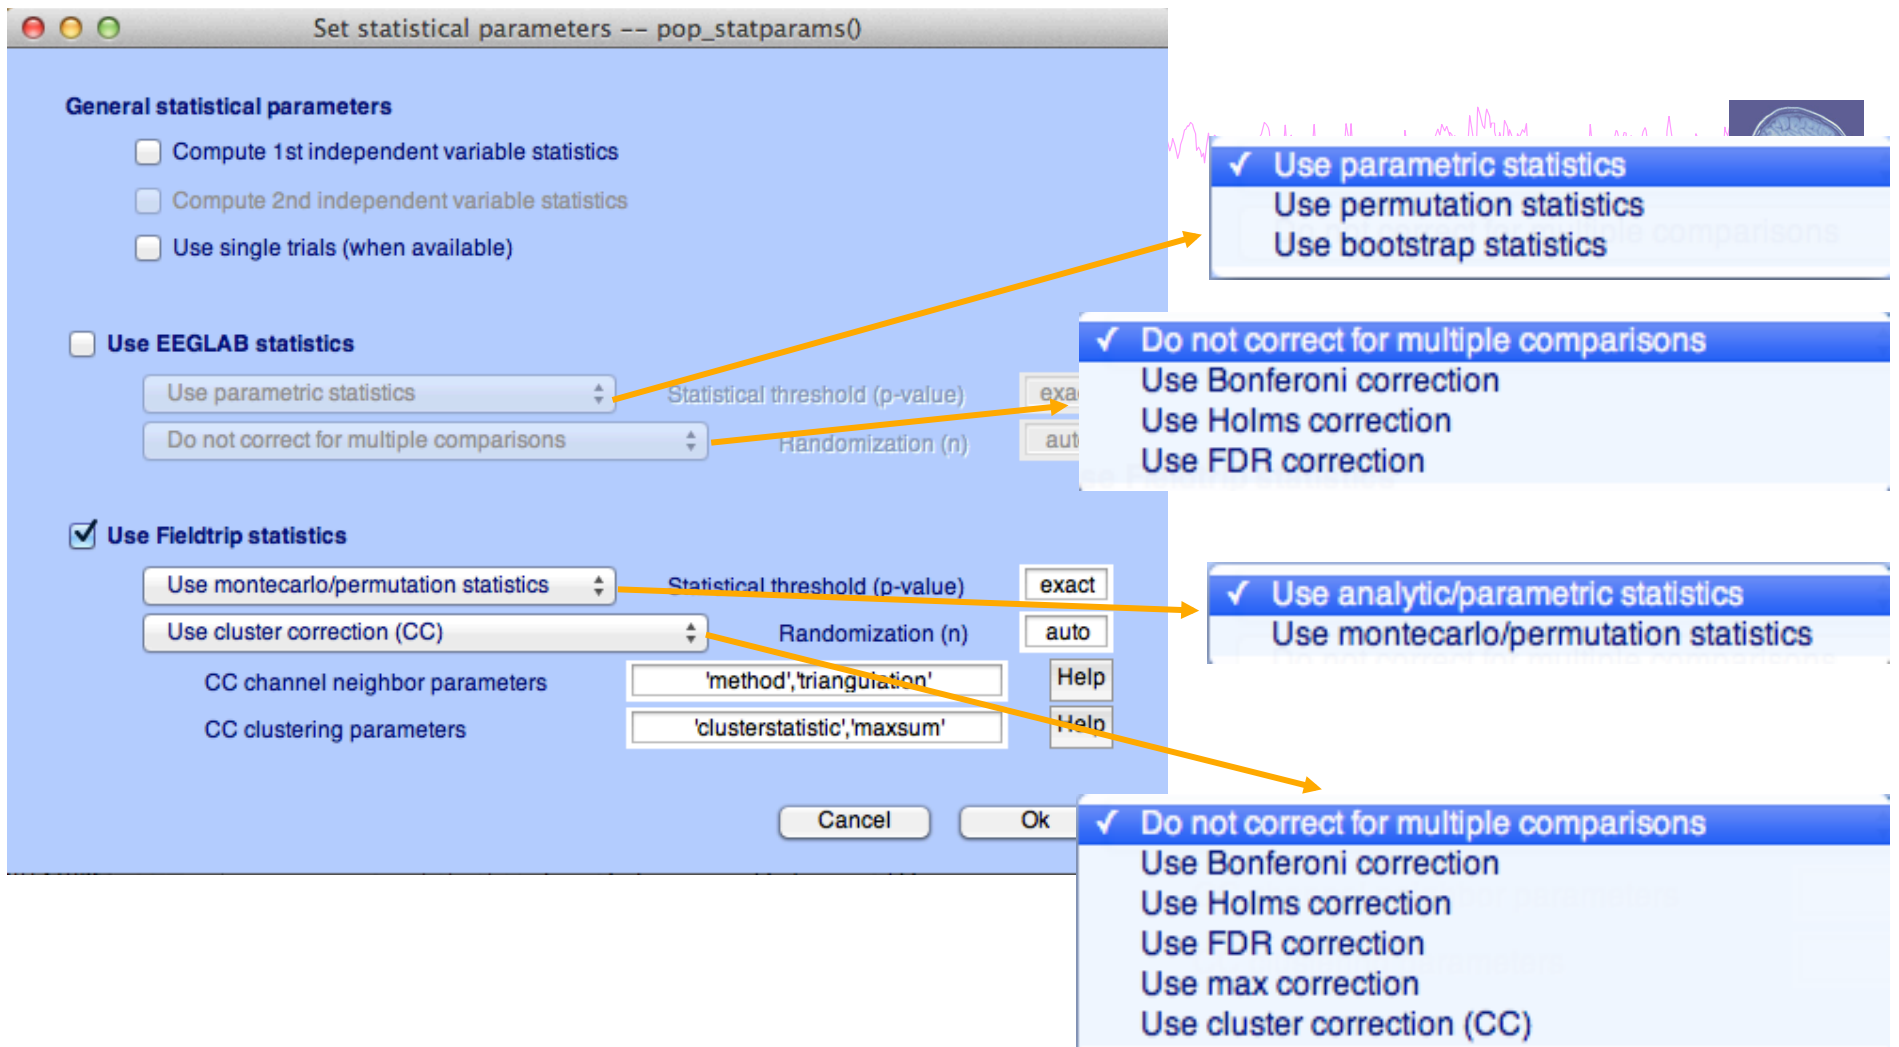

Figure 5: Channel ERP

**std\_stat() function in EEGLAB**

# Use single trials

Select and compute component measures for later clustering -- pop\_precomp()

**Pre-compute channel measures for STUDY 'Sternberg' - 'STUDY.design 1'**

**Channel list (default:all)**  ...

☒ Spherical interpolation of missing channels (performed after optional ICA removal below)

☐ Remove ICA artifactual components pre-tagged in each dataset

☐ Remove artifactual ICA cluster or clusters (hold shift key)

ParentCluster 1  
Cls 2  
Cls 3  
Cls 4

**List of measures to precompute**

☐ ERPs Baseline ([min max] in ms)

☐ Power spectrum Spectopo parameters  Test

☐ ERSPs ☐ ITCs } Time/freq. parameters  Test

☒ Save single-trial measures for single-trial statistics - requires disk space

☐ Recompute even if present on disk

Help Cancel Ok

# Exercices

## Experiment with STUDY statistics

- Load the Stern STUDY
- Look at significant difference in the first default design or the second design created in the previous exercise in all channel (spectrum)
- using first parametric EEGLAB methods (and FDR correction for multiple comparisons)
- then using the cluster method (Fieldtrip – statistics)
- **For those with powerful computers:** type “matlabpool” on the command line and pre-compute channel time-frequency decompositions with options 'cycles' [3 0.8] 'nfreqs' 30 'ntimesout' 40 'verbose' 'off' (watch for the quote formatting when copying and pasting)
